Commercial Casement & Awning Window Solutions

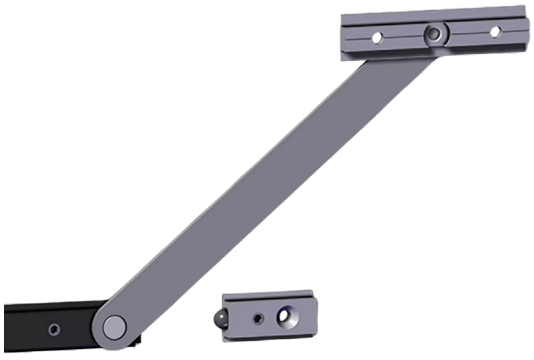

Limit Devices & Friction Adjusters

Made for for safer, smarter vent operation.

A comprehensive range of Limit Devices & Friction Adjusters is available to meet virtually any application requirement, including projection or casement windows, Euro groove or surface mount configurations, non-releasable, releasable, or patented keyed releasable options, and in-hinge solutions.

Universal Limit Device

1292 Friction Adjuster

Product Features

Universal Limit Device
Provides 4” limiting with a single device size and standardized mounting.

Patented Keyed Bracket
Allows easy release using a security hex key for convenient vent access during cleaning and maintenance.

Positive Opening Control
Ensures reliable and consistent limitation of vent opening.

Adjustable Stop Positions
Offers multiple position settings for flexible opening control.

Code Compliance Solutions
Supports compliance with limited window opening code requirements.

Enhanced Vent Friction Control
Provides additional friction to improve vent positioning and control.

Multiple Arm & Track Options
Available in a wide range of arm and track sizes to suit various applications.

Cost-Effective In-Hinge Option
An optional in-hinge limit solution that eliminates the need for drilling into the stainless steel track.

Specifications

- Shims are available to increase thickness.
- Customer Design and Engineering Support Available.
