ASSA ABLOY

Constant Force Balances

ROLLER TILT® Elite™

Built to go the distance.

As part of ASSA ABLOY, Caldwell transformed the fenestration industry with Constant Force Spring Balances and the first patented ROLLER TILT® in 1993. The ROLLER TILT® Elite™ 562 and 625 cartridge systems continue that innovation with an extended weight range for the same fixed bracket design and springs that move with the sash to reduce friction and noise.

ROLLER TILT® Elite™ 562 Single

ROLLER TILT® Elite™ 562 Double

ROLLER TILT® Elite™ 562 Triple

Product Features

Smooth & quiet operation
Patented moving coil system provides lower operating force and less noise.

Built for strong, easy fit
The robust drop-in cam provides excellent structural performance and accepts round head pivot bars.

Long-term protection
Stainless steel springs are corrosion resistance and are coated for low friction.

Maximized value
Balances are applied based on weight range only, reducing SKUs and lowering cost.

Purchase Options

» **Cartridge:** Directly from box to balance pocket with the bracket attached. A lean solution that saves time, reduces SKUs and is defect free.
» **Assembled:** Balance arrives assembled, without a bracket attached.

Additional Options

- Optional friction screw available for easy field adjustments.
- Optional tamper lock available to limit unintended sash removal.
