

## The latest design within Interlock's family of casement hardware offerings, the VESTA™ casement furniture series, where high performance meets high style.

Combining sleek aesthetics and clean lines with optimized security and ease of operation, the VESTA™ casement lock handle offers an extra low profile, eliminating interference with blinds and window treatments, while providing a modern casement and awning window application solution to fit today's architectural and interior design demands.

### Lock Handle Features

- Low profile with only 8 mm projection
- Single-point or multi-point configurations with non-handed design
- 48 mm of lock bar travel provides secure multipoint locking and enables progressive locking action
- Designed for use with all Interlock casement locking solutions

### Materials and Finishes

- Casted zinc alloy
- Available in color matched, powder-coated alternative or architectural finishes
